# ALL TERRAIN CRANE DESIGNED FOR YOUR TODAY'S NEEDS

## MAIN FEATURES FOR SUPERSTRUCTURE

- New designed stout 4-section "FULLPOWER" boom, hydraulically extended to the full length
- 2-section lattice fly jib with 3-stage offset angle
- The two independently driven winches are equipped with automatic brakes
- Roomy 950 mm wide cab
- Electrically controlled joystick levers
- A high-performance turbo-charged engine, and variable displacement piston pump
- Rugged outriggers

## HYDRA-LEVEL™ SUSPENSION SYSTEM

• The "HYDRA-LEVEL" Suspension System guarantees good road holding and stability when cornering and traveling at speed. It hydraulically adjusts to give the smoothest of rides over rough terrain and can be varied to allow passage in areas of restricted head room.

## 4-STEERING MODES ENSURE EASY TURNING

• The driver can select front 4-wheel steering, counter steering, crab steering and rear 4-wheel steering from both carrier and crane cab. When traveling on highway, the rear steering can be locked by an automatic centering switch.

## SPACIOUS AND FUNCTIONAL CARRIER CAB

• The 3-person wide cab is designed and built with full sound-proofing and vibration insulation for vastly improved driver comfort. The tilt type of steering wheel can be adjusted, and the high-backed seat can be moved forward or backward, raised or lowered to suit any physique.

## WELL-APPOINTED CRANE CAB

• All controls and instruments are ergonomically designed for optimum comfort. Light-touch joystick levers are employed for ease of operation. A wide window is incorporated in the roof for better visibility.

• Dual winches with automatic brakes and irregular winding prevention rollers.
