NOTE:

1. The used cranes described in this brochure are Japanese domestic models. They are not export models.
2. The overall dimensions and gross vehicle weight appear as reference only.
3. The specifications contain representative carrier models.
4. The photographs in this brochure show cranes in new condition, but not in the actual delivery condition of the used cranes.
5. Availability of used cranes depends on current stock at hand. For further information, please contact Tadano or your Tadano dealer.
6. The cranes lifting capacity between 80 - 360 ton, cannot travel on the road as a single vehicle. The crane must be dismantled and transported separately when the vehicle per axle load exceeds 10 tons and the gross vehicle weight exceeds 38 tons according to the Japanese vehicle regulations.
